Home Base

Have a single place students go for all the information

What You Need:

1. **A Place To Store Materials**
2. **Tools To Communicate**
3. **Clean User Experience**
4. **Ways To Assess Learners**
5. **3rd Party Integrations If Possible**

Learning Library

Make the learning permanent through having your own content repository

Google Keep simplifies your workflow

Rather than divide your notes into notebooks, the organization in Google Keep comes down to just two simple things: labels (tags) and colors.

- Save Links
- Sort Learning Materials
- Share with Others

Connecting Through Media

Engage learners with rich media options - audio, pictures, video, and interactivity

"Online instructors need a framework for teaching beyond text using rich media as instructional resources."

Available through a Creative Commons license

Covello's work moves to target the "relatively large gap in evidence-based practice for teaching online as a profession due to its newness."

Communication

Connect Frequently - in a variety of ways
Succinct - Clarity of Vision - Be Consistent

1. **Provide a good weekly overview to students and families.**
2. **Make it clear what needs to be completed and how it will be assessed.**
3. **Make sure learning support persons have access to materials to help at home.**
4. **Focus on customer service - timely responses and contact.**
5. **Take away stress when and where possible.**

"Keep in contact with them regularly; providing updates with a supportive tone will reassure them and give them direction to succeed."
Indiana University - April 10, 2020

"How do you know you're using the right technology, at the right time, and—perhaps most importantly—delivering the right messages?"
Chris Frazier - April 1, 2020

Special Guest - Kelly Walsh

The Pandemic Educator

Kelly Walsh is the CIO & CISO and an Assistant Professor at The College of Westchester in White Plains, NY. In 2009, Walsh founded the popular website EmergingEdTech.com, where he writes and shares guest articles about emerging instructional technologies and student-centered learning. Walsh is a frequent speaker at education technology conferences, and was a columnist for University Business magazine for many years. In May of 2019, Walsh was identified as a “Top 30 Higher Education IT Influencer” by EdTechMagazine.com. In his spare time, he writes and records music in a variety of genres (kwalshmusic.com).

“Technology has helped to radically advance the availability of education. It is bringing remote learners, teachers, and experts together to teach and learn from each other. It is creating so many possibilities for active, engaged learning. It is changing the world.”

Reset Emergency Remote Learning Practices: Parents are Not Ok

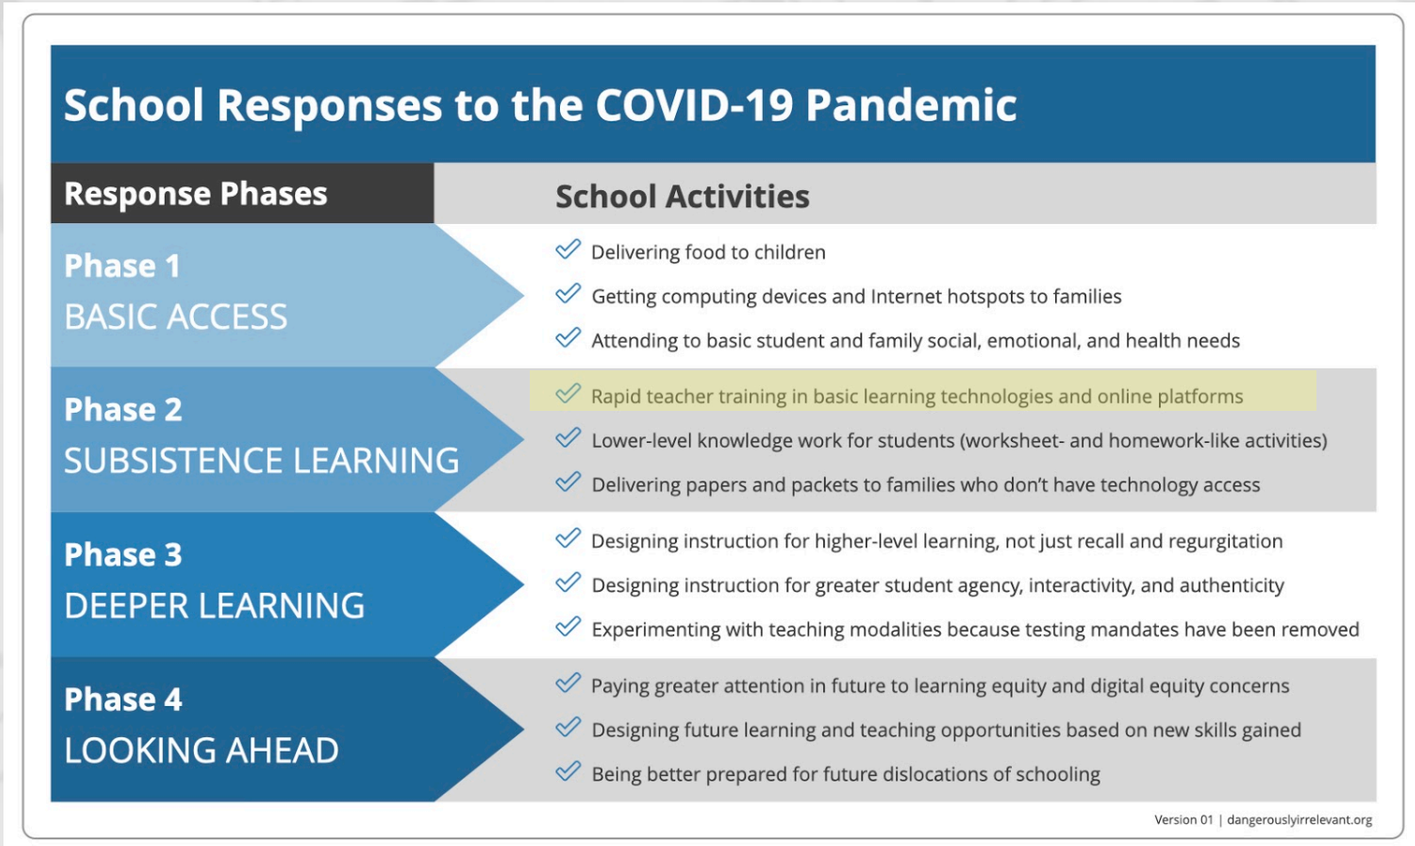
Bryan Setser April 9, 2020

"You've announced emergency remote learning, and we're seeing the poor planning every day and every night in our homes."

"What parents need is clear, consistent, and supportive communications on what schools are trying to accomplish each week."

"Through it all, education leaders need to understand that the parent lift is far different than what it was with a couple of nights of homework and/or an evening to check assignments. "

"The Pretty Plan"



It is only when they are provided the knowledge, skills, resources, and support that [teachers] will integrate technology in the curriculum to maximize its effects on teaching and learning (Papanastasiou, Zemblyas, & Vrasidas, 2003)
